DEPARTMENT OF TRANSPORTATION

APPLICATION

2015 GRANT PROGRAM IN SUPPORT OF NATURAL GAS PIPELINE SAFETY

The NORTH DAKOTA PUBLIC SERVICE COMMISSION hereby applies to the Department of Transportation for Federal funds appropriated for the support of Pipeline Safety Programs established under 49 U.S.C. Section 60101 et seq. The actual amount of Federal reimbursement depends upon the availability of appropriated funds and state program performance. The total program funding for the State Program Gas and Hazardous Liquid Base Grants is subject to availability of funds and the enactment of an appropriations bill, and will be distributed according to PHMSA's State Base Grant Allocation formula and policies.

The State Agency:

Intends to submit an annual certification for calendar year 2015 to the Secretary of Transportation under 49 U.S.C. Section 60105.

The state agency plans to carry out the Pipeline Safety Program, during calendar year 2015, as described in Attachment 1, "Description of State Pipeline Safety Program". To accomplish the program, the state agency proposes to expend funds, if applicable, as set forth in Attachment 2, "Pipeline Safety Program Estimated Budget".

NATURAL GAS PIPELINE SAFETY PROGRAM

CERTIFICATION FOR CALENDAR YEAR 2015

This certificate (including attachments) is submitted by the NORTH DAKOTA PUBLIC SERVICE COMMISSION (the state agency) to the secretary of Transportation (the Secretary) under Section 60105 of Title 49, United States Code.)

Pursuant to Section 60105(a) of this Title, the state agency hereby certifies to the Secretary that:

1. Under the Constitution and laws of North Dakota it has regulatory jurisdiction over the safety standards and practices of all intrastate pipeline transportation within North Dakota, unless otherwise noted on Attachment 1.
2. It has adopted, as of the date of this certification, each federal safety standard established under this Title that is applicable to the intrastate pipeline transportation under its jurisdiction as set forth in paragraph 1, or, with respect to each such federal safety standard established within 120 days before the date of the certification, is taking steps pursuant to state law to adopt such standard. (The adoption by a state agency of a safety standard that is additional to or more stringent than the applicable federal standard is compatible with the federal standards [see Section 60102(a)(1) of this Title] does not prohibit that state agency from certifying to the actions described in this paragraph.)
3. It is enforcing each adopted standard through ways that include inspections conducted by State employees meeting the qualifications the Secretary prescribes under section 60107(d)(1)(C) of this title.
4. It is encouraging and promoting the establishment of a program designed to prevent damage by demolition, excavation, tunneling, or construction activity to the pipeline facilities to which the certification applies that subjects persons who violate the applicable requirements of that program to civil penalties and other enforcement actions that are substantially the same as are provided under this chapter, and addresses the elements in section 60134(b);
5. It has authority to require each person who engages in the transportation of or who owns or operates pipeline facilities subject to its jurisdiction as set forth in paragraph 1, to establish and maintain records, to make reports, and to provide information, and that this authority is substantially the same as the authority provided under Section 60117 of this Title.
6. It has authority to require each person who engages in the transportation of or who owns or operates intrastate pipeline transportation facilities, subject to its jurisdiction as set forth in paragraph 1, to file with it for approval a plan for inspection and maintenance substantially as described under Section 60108(a) and (b) of this Title.
7. The laws of North Dakota provide for the enforcement of the safety standards referred to in paragraph 2 by injunctive relief and civil penalties substantially the same as those provided under Sections 60120 and 60122(a)(1) and (b)-(f) of this Title.
8. NORTH DAKOTA PUBLIC SERVICE COMMISSION will submit an annual progress report as provided under 60105 (c) (1).

The state agency furthermore agrees to cooperate fully in a system of federal monitoring of the state program to assure the program is being carried out in compliance with this certification. The terms intrastate pipeline transportation, pipeline facilities, transportation of , and state, are used in certification as defined in this Title. This certification is subject to termination by the Secretary in accordance with Section 60105(f) of this Title, on reasonable notice and after opportunity for hearing, may reject the certification or take such other action as deemed appropriate to achieve adequate enforcement including assertion of federal jurisdiction.

In witness whereof, the hand and seal of the NORTH DAKOTA PUBLIC SERVICE COMMISSION is hereby affixed on the date below.

Description of State Pipeline Safety Program

Please provide a detailed description of the state's planned pipeline program for 2015

2015 Pipeline Safety Grant Application Program Description and Planned Activities

Under North Dakota Century Code Section 49-02-01.2, the North Dakota Public Service Commission (Commission) has authority to establish and enforce minimum safety standards for the design, construction, and operation of facilities used for intrastate distribution and transmission of gas (<http://www.legis.nd.gov/cencode/t49c02.pdf>). With this authority, the Commission adopts rules under North Dakota Administrative Code Chapter 69-09-03 related specifically to gas pipeline safety including adoption by reference Part 190, Part 191, Part 192, and Part 199 of Title 49 of the Code of Federal Regulations (<http://www.legis.nd.gov/information/acdata/pdf/69-09-03.pdf>). A Commission rulemaking, currently in progress, proposes to adopt Part 190, Part 191, Part 192, and Part 199 of Title 49 in effect as of September 30, 2014. The Commission is also the enforcement agency for North Dakota's One-Call Excavation Notice System under North Dakota Century Code Chapter 49-23 (<http://www.legis.nd.gov/cencode/t49c23.pdf>).

For 2015, the Commission will again partner with the US Department of Transportation, Pipeline and Hazardous Materials Administration (PHMSA) to assure safety in design, construction, inspection, testing, operation, and maintenance of intrastate gas pipeline facilities in North Dakota.

Program Description

In 2015, the North Dakota Public Service Commission's Gas Pipeline Safety staff is expected to conduct a minimum of 136 inspection days on the Intrastate Operators. There are eleven intrastate operators who oversee fourteen total inspection units, including six private distribution units, one municipal LPG unit, and six intrastate transmission units. In North Dakota there are 149,347 total services, 3,296.4 total miles of mains, 239.99 total miles of transmission lines, 9.7 miles of class A gathering lines and 5.0 miles of class B gathering lines.

Inspections and Program Activity

The following briefly outlines the different types of gas pipeline safety inspections, how often they will be conducted, and on what type of operator:

Each gas operator (intrastate transmission, gathering, or distribution) will receive one comprehensive records inspection per year (including any applicable OQ Protocol 9 inspections), as stated in the Commissions Gas Pipeline Safety Inspection Plan.

Each gas operator/inspection unit will receive one design, testing and construction inspection per year (one for the operator's staff, and, if time permits, one inspection for each contractor). All other operators will be monitored for construction activity and inspected if and when any such projects are scheduled as stated in the Commissions Gas Pipeline Safety Inspection Plan.

Each gas operator/inspection unit may receive any combination of the following compliance inspections, as often as necessary within any one year period: leak surveying, corrosion control, overpressure protection/MAOP, district regulator stations, master meter jurisdiction investigation, and a propane

jurisdiction investigation, farm tap inspection, or meter set inspection. Necessity for any of the above special field inspections shall be determined during the annual comprehensive records inspection of each operator as stated in the Commissions Gas Pipeline Safety Inspection Plan.

Beginning in 2015, each gas operator (other than propane or master meter operators) will receive a comprehensive inspection of its written Drug and Alcohol Use Prevention Plan once every four years (a review of an operator's knowledge of its Plan will be done annually during the comprehensive records inspection), as stated in the Commissions Gas Pipeline Safety Inspection Plan.

Each gas operator, after having received an initial comprehensive inspection may then receive additional comprehensive inspection in sections of its Operation and Maintenance/Emergency Response Plan/ Operator Qualification Plan/Integrity Management Plan, as stated in the Commissions Gas Pipeline Safety Inspection Plan. However, any changes made to those plans will be reviewed on an ongoing basis.

Beginning in 2015, the Program Manager will be utilizing a risk-based analysis and assessment of risks pertinent to operators to determine other inspection priorities.

Other Parameters:

Operators will be selected for inspection based upon the following criteria:

1. Date elapsed since last inspection;
2. History of violations;
3. Any special projects or activities being scheduled;
4. Reasonable seasonal rotation; or
5. As set forth in the division's Gas Pipeline Safety Inspection Plan

Follow-up inspections may be conducted on all operators/inspection units on a case by case basis, and as often as necessary to determine compliance.

The Commission will make its inspector available to OPS Central Region on a per project basis as requested by OPS for the purpose of conducting design, testing and construction inspection on any new interstate gas or liquid lines; or for other work on these systems as specified in the federal/state MOU.

Operator Training:

On-site operator training may either be scheduled as requested by each individual operator, or as determined by Program Manager. The joint TQ/NDPSC operator training seminar will be scheduled at least once every two years (coordination with the State of South Dakota has been established in order to provide a joint TQ/State seminar to North Dakota operators at least once every two years).

Incidents:

Incidents, as defined in 49 CFR Part 191.3, will continue to be thoroughly investigated at the earliest possible response time as set forth in the Commissions Gas Pipeline Safety Inspection Plan; and, quickly reported to PHMSA, Central Region. In addition, Commission gas pipeline safety inspector will be available to assist PHMSA/NTSB investigators not only on intrastate gas distribution/transmission systems, but any other pipeline system jurisdictional to PHMSA.

Record Keeping:

The Program Manager will ensure the following computerized gas safety records are maintained:

- a) Year-to-date tally reports of the gas safety program, which includes the operator name and address, type of inspection, date(s) of inspection, number of inspection units and person days assigned to the inspection, number and date of probable violations and proposed compliance orders issued, number and amount of civil penalties proposed, number of violations found or rescinded by the Commission, number

and amount of civil penalties assessed by the Commission, date civil penalties were collected, date(s) of various orders issued in the case, any pertinent comments about the case, and the total number of Warning Letters issued;

b) A 10-year history by operator of gas safety violations found by the Commission for all jurisdictional natural gas and propane operators in the state; and

c) Document forms for the following:

- 1) Notice of probable violation and cover letter;
- 2) Warning letter; and
- 3) All types of inspection forms.

In addition to the above records, the Program Manager will ensure retention of "in" and "out" correspondence files, staff training files, budget files, purchase files, division safety inspection files, monthly time summary, mileage logs, and any other records deemed necessary by the Commission.

All record retentions will conform to NDCC 54-46-05.

Damage Prevention:

On August 12, 2009, the Commission began enforcement of the State's excavation damage laws. The Commission continues to have enforcement authority.

? The Commission has the ability to receive written complaints from utility operators, excavators, and members of the public; process those complaints under various applicable sections of the North Dakota Century Code; administer civil penalties; and keep records as required.

? A ND Damage Prevention Plan was developed and approved by the Commission under the requirements of the ND Damage Prevention Law, under 49 CFR Part 192 and under 49 CFR Part 198; the nine elements of the PIPES Act; and the best practices of the Common Ground Alliance.

? The Commission will continue to liaison with the ND One-Call Board during any complaint case.

? The Program Manager will administer training on this program to the various stakeholders and the public in conjunction with the ND One-Call Board as so directed by the Commission.

Staff:

North Dakota's Gas Pipeline Safety Program is organized in the Commission's Compliance and Competitive Markets Division and supervised by the Division Director. For 2015, it is estimated that approximately 14 percent of the Director's time will be spent on the Program. The Program utilizes a Program Manager/Inspector who will devote 25% of time as Program Manager, 74% of time as an inspector, and 1% of time for Damage Prevention. The Commission plans to fill the currently vacant full-time gas pipeline safety inspector position, as soon as possible, so that there will be the equivalent of one man-year to the Program in 2015.

For 2015, Program Manager accepted the position of Vice-Chairman of the National Association of Pipeline Safety Representatives (NAPSR) Central Region, and will host the 2015 Central Region NAPSR meeting

Inspector Training:

In the last quarter of 2014, the Program Manager/Inspector is enrolled and scheduled for the following training and associated web-based prerequisite training:

1. PHMSA-PL3322 Evaluation of Operator Qualifications (OQ) Programs course
2. PHMSA-PL3267 Fundamentals of Integrity Management Course
3. PHMSA-PL5342 Safety Evaluation of Liquefied Petroleum Gas (LPG) course

4. PHMSA-PL1245 Safety Evaluation of Distribution Integrity Management Programs

For 2015, the Program Manager/Inspector is on the waitlist for the following TQ training and associated web-based prerequisite training.

1. PHMSA-PL1297 Gas Integrity Management Protocol (IM) course
2. PHMSA-PL3267 Fundamentals of Integrity Management course

Upon completion of these courses, the Commission believes the Program Manager/Inspector will have completed all required PHMSA training.

The Commission expects to hire a gas safety Inspector later in CY2014 or early CY2015 to fill a current vacancy. This Inspector will be registered for all required PHMSA training over a three years period, beginning with core training courses including:

1. PHMSA-PL1250 Safety Evaluation of Gas Pipeline Systems Course
2. PHMSA-PL1255 Gas Pressure Regulation and Overpressure Protection Course
3. PHMSA-PL1310 Plastic and Composite Materials course
4. PHMSA-PL3242 Welding and Welding Inspection of Pipeline Materials Course
5. PHMSA-PL3257 General Pipeline Safety Awareness Course
7. PHMSA-PL3293 Corrosion Control of Pipeline Systems Course
8. PHMSA-PL3256 Failure Investigation Pipeline Failure Investigation Techniques Course

Instructions

- 1** Enter a name for the application in the Application Filing Name field.

 - This application can be completed in its entirety offline; however, you will need to login to the Grants.gov website during the submission process.
 - You can save your application at any time by clicking the "Save" button at the top of your screen.
 - The "Save & Submit" button will not be functional until all required data fields in the application are completed and you clicked on the "Check Package for Errors" button and confirmed all data required data fields are completed.
- 2** Open and complete all of the documents listed in the "Mandatory Documents" box. Complete the SF-424 form first.

 - It is recommended that the SF-424 form be the first form completed for the application package. Data entered on the SF-424 will populate data fields in other mandatory and optional forms and the user cannot enter data in these fields.
 - The forms listed in the "Mandatory Documents" box and "Optional Documents" may be predefined forms, such as SF-424, forms where a document needs to be attached, such as the Project Narrative or a combination of both. "Mandatory Documents" are required for this application. "Optional Documents" can be used to provide additional support for this application or may be required for specific types of grant activity. Reference the application package instructions for more information regarding "Optional Documents".
 - To open and complete a form, simply click on the form's name to select the item and then click on the ==> button. This will move the document to the appropriate "Documents for Submission" box and the form will be automatically added to your application package. To view the form, scroll down the screen or select the form name and click on the "Open Form" button to begin completing the required data fields. To remove a form/document from the "Documents for Submission" box, click the document name to select it, and then click the <= button. This will return the form/document to the "Mandatory Documents" or "Optional Documents" box.
 - All documents listed in the "Mandatory Documents" box must be moved to the "Mandatory Documents for Submission" box. When you open a required form, the fields which must be completed are highlighted in yellow with a red border. Optional fields and completed fields are displayed in white. If you enter invalid or incomplete information in a field, you will receive an error message.
- 3** Click the "Save & Submit" button to submit your application to Grants.gov.

 - Once you have properly completed all required documents and attached any required or optional documentation, save the completed application by clicking on the "Save" button.
 - Click on the "Check Package for Errors" button to ensure that you have completed all required data fields. Correct any errors or if none are found, save the application package.
 - The "Save & Submit" button will become active; click on the "Save & Submit" button to begin the application submission process.
 - You will be taken to the applicant login page to enter your Grants.gov username and password. Follow all onscreen instructions for submission.
